

TELGUARD DOOR ENTRY

Telguard offers a wide range of door entry products that have been brought to the market using the latest technologies. SCS have found that many of our customers are not aware of Telguard systems and its full capability, so we would like to enlighten you to how the Telguard system works.

Telguard is a telephone based entry system, the way in which this works is as follows:

1. A main call station is located at the main front door. This can either be video & audio or DDA with a variety of options i.e. Proximity, keypad etc.
2. **To receive a call:**
Your telephone will ring in the normal way. Once you have confirmed the identity of your visitor, simply press the # key on your telephone. You will hear a beep from the earpiece to confirm the Telguard has received the command to operate the entrance and you then replace your telephone handset.
3. **Video Option:**
When the system incorporates a camera, the picture from the camera will normally be linked to the residents television. The channel will be tuned as normal but to the entrance picture rather than a television programme. Then when that channel is selected it will show the relevant picture from the entrance.

The Telguard can operate up to 5 different facilities as it has 5 onboard relays for example:

- Relay one can control the main entrance door by pressing #
- Relay two can control the vehicle gate by pressing 2#
- Relay three can be used as a hold open facility by pressing 3# to close press 6#
- Relay four can be used to activate CCTV or illuminate a driveway by pressing 4#
- Relay five is used for a trades facility. This is activated by pressing # on the keypad version, or an individual button. A time clock would be used to limit the activation period of this feature.

SCS have installed and taken over a number of these systems and we have found them to be very reliable, cost effective and a great product overall.

If you would like more information on the above or a quotation please contact our Sales department on 0118 978 3381 or email sales@scssecure.co.uk
